

Dear FCC,

This is a brief letter regarding the issues of Net Neutrality and the problems followed by it if it is removed. This goes against all things considered American. To take away something so free as the access to internet just so ISP's can make a "little" more money is incredibly ridiculous. Whether or not people realize it this is a huge deal. This country was founded on the basis of freedom, "land of the free", but the removal of net neutrality goes against this foundation and the standards of freedom set by Americans. The vastness and exploration of the internet brings joy to many people including myself. This is OUR country, OUR internet, and OUR lives we are not owned by big businesses especially not by our ISP's. Please take this as a serious complaint and know that this is the thoughts of millions.

Sincerely,  
Joseph Worley of Reddit, Google,  
Twitter, and Netflix
